## Environmental Policy

We acknowledge that our construction operations and activities can have an impact on the environment.

We are committed to minimising our impact on the environment, including those of our subcontractors and suppliers, in preventing pollution, protecting the environment and continually improving our environmental performance.

Our policy is to:

- Comply with all relevant environmental legislation and codes of practice.
- Maintain our Environmental Management System ISO 14001:2015.
- Set and review environmental objectives as part of our Environmental Management System that will allow us to continuously improve.
- Promote environmental best practice by offer of suggestions that could reduce the environmental impact of a project.
- Reduce waste production and divert waste away from landfill by working with local companies to dispose of mixed recycling and promoting the re-use of materials.
- Work with our supply chain to reduce the impact of plastic and packaging pollution, along with the use of single-use plastics at our Head Office and construction sites.
- Minimise energy and water consumption in our buildings and processes by using them efficiently.
- Reduce the effects of noise and light pollution from our premises and reduce any impacts from our operations on the environment and local community.
- Efficiently use natural resources and promote the purchase and use of sustainable materials.
- Assess the environmental impact of any new processes or products we intend to introduce in advance.

• Ensure that all employees are trained in our Environmental Management System to enhance awareness of all environmental matters.

• Address complaints about any breach of our Environmental Policy promptly and to the satisfaction of all concerned.

This Policy will be reviewed annually in consultation with staff, associates and customers.

The policy will be communicated to all staff via the Intranet and copies will be posted on all noticeboards in the office and on site.

Signed:

Martin Sandall  
Managing Director

January 2024

### Roles and responsibilities:

*Estimators* will evaluate client requirements and conduct an initial aspect and impact evaluation ensuring resources are considered in tender prices.
