

## **JENNER GROUP - ENHANCED SAFETY PROCEDURES COVID-19 (CORONAVIRUS) PANDEMIC**

### **JENNER GROUP – COVID-19 (CORONAVIRUS) POLICY**

Throughout the Coronavirus (COVID-19) pandemic Jenner Group have monitored the situation very closely, on a day-by-day basis, whilst taking relevant guidance from the government, the Construction Leadership Council (CLC) and our own professional safety advisors, to ensure we respond efficiently and effectively to safeguard all those within our duty of care.

Within Jenner a COVID-19 Committee was established from the outset with the remit to meet on a weekly basis (or more regularly if required) to ensure that we as a business respond appropriately to the risks and has proved highly effective in providing clarification, guidance and instruction to our team. This committee remains in place should further COVID-related decisions prove necessary to ensure the smooth and safe operation of the business.

Enhanced safety measures were immediately adopted at the height of the pandemic and have remained in place throughout, to keep everyone safe. The measures have been clearly communicated on a regular basis to all our staff, suppliers, sub-contract supply-chain partners, clients, and their consultant teams, requesting their strict adherence to these guidelines. The guidance assesses all areas of our operations both site and office-based, and include social distancing guidelines, advice on wearing of face coverings, daily temperature monitoring as well as heightened hygiene and cleaning procedures. All staff who can work remotely continue to be encouraged to do so to minimise numbers within communal areas and every member of staff is requested to undertake a Lateral Flow Test prior to attending their work environment at the start of each working week.

New working procedures have been adopted as part of our enhanced safety culture within Risk Assessments and Method Statements and are updated accordingly throughout our entire supply chain with a **zero-tolerance approach to non-conformance**.

It remains imperative as the pandemic continues that everyone stays alert and vigilant, with the highest regard for the welfare of others, whilst following the correct steps for testing, isolating, and reporting should they feel unwell or display the common symptoms of COVID-19 or any of its variants. Our Jenner Group protocol remains in place for all confirmed cases of COVID-19 (Coronavirus).

All information and documentation relating to COVID-19 pandemic is available via the dedicated section of our website: [www.jenner-group.co.uk/covid-19](http://www.jenner-group.co.uk/covid-19)

**The health and welfare of all our staff, stakeholders, and their loved ones, remains our absolute priority throughout these continuously challenging times.**
